*Please note, accrued interest is based on prior day valuation and is not a real time calculation. Accrued interest may be overstated on the Payable Date of a security, since the interest paid will also be reflected as a Change (\$) in "Cash" for that day.

"Net Value Increase/ (Decrease)" reflects the difference between your total purchases, and the sum of the current value of the fund's shares, and cash distributions shown. This calculation is for informational purposes only and does not reflect your total unrealized gain or loss nor should it be used for tax purposes.

Account contains securities for which cost basis and/or other values are not available (indicated by a "N/A" displaying in the cost and/or gain (loss) fields). Totals shown do not incorporate gains (or losses) for these securities. In addition, total cost or adjusted cost may also be unavailable and excluded from totals. Please contact your Financial Advisor for additional information. The accuracy of the purchase date, cost basis and other information you provide is not independently verified.

Prices of securities not actively traded may not be available, and are indicated by a dash "-", or "N/A".

For Pricing information, please go to the Help + Support section.

An investment in an exchange-traded fund involves risks similar to those of investing in a broadly based portfolio of equity securities traded on exchange in the relevant securities market, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in stock prices. The investment return and principal value of ETF investments will fluctuate, so that an investor's ETF shares, if or when sold, may be worth more or less than the original cost. Investors should carefully consider the investment objectives and risks as well as charges and expenses of an exchange traded fund before investing. To obtain a prospectus, contact your Financial Advisor or visit the fund company's website. The prospectus contains this and other information about the fund. Read the prospectus carefully before investing.

Special Considerations Regarding Structured Investments
Structured Investments are complex products and may be subject to special risks, which may include, but are not limited to: loss of initial investment; issuer credit risk; and price volatility resulting from any actual or anticipated changes to issuer's and/or guarantor's credit ratings or credit spreads; limited or no appreciation and limits on participation in any appreciation of underlying asset(s); risks associated with the underlying reference asset(s); no periodic payments; call prior to maturity; early redemption fees for market linked deposits; lower interest rates and/or yield compared to conventional debt with comparable maturity; unique tax implications; limited or no secondary market; and conflicts of interest due to affiliation, compensation or other factors which could adversely affect market value or payout to investors. Investors also should consider the concentration risk of owning the related security and their total exposure to any underlying asset. Structured Investments may not perform in a manner consistent with the statement product category where they appear and therefore may not satisfy portfolio asset allocation needs for that category. Accrued interest, estimated annual income and estimated yield for Structured Investments with a contingent income feature, including Range Accrual Notes and Contingent Income Notes, assume optimal performance of the underlying asset(s) and payment in full of all contingent interest. However, contingent interest is only paid if the specified accrual conditions are met during the relevant observation period. Actual accrued interest, annual income and yield will be dependent upon the performance of the underlying asset(s) and may be significantly lower than the estimates shown. For more information about the risks specific to your Structured Investments, you should contact your Financial Advisor. For important information on the risks and conflicts of interest related to structured products generally, click here or contact your Financial Advisor.

Savings and Time Deposits
Transfers into the Savings Program initiated after 4pm E.T. on a non-business day will not be available to you until the next business day. Transfers into the Savings Program will not begin to earn interest until the funds are deposited into the Savings Program on the next business day.

For Savings & Time deposits, APY (%) is last valued as of previous day.

For Savings & Time deposits, Accrued interest calculated since last payment date.

Important Information About Auction Rate Securities

Morgan Stanley

For certain Auction Rate Securities there is no or limited liquidity. Therefore, the price(s) for these Auction Rate Securities are indicated as not being available by a dash "-" or "N/A". There can be no assurance that a successful auction will occur or that a secondary market exists or will develop for a particular security.
