Total Client Investment: Cost of shares directly purchased and still held. Does not include shares purchased through reinvestment.

Cumulative Investment Return: Estimated Market Value minus Total Client Investment. Cumulative Investment Return is the dollar value of the capital appreciation (depreciation) of all shares purchased and still held, including shares acquired through reinvestment of dividends and distributions, which may be greater or less than the actual income distributed.

Market Timing: Merrill's policies prohibit mutual fund market timing, which involves the purchase and sale of mutual fund shares within short periods of time with the intention of capturing short-term profits resulting from market volatility. Market timing may result in lower returns for long-term fund shareholders because market timers capture short-term gains that would otherwise pass to all shareholders and due to increased transaction costs and fewer assets for investment due to the need to retain cash to satisfy redemptions.

Sales Charge Discounts or Waivers: Many funds offer various sales charge discounts or waivers depending on the terms of the prospectus and/or statement of additional information. You should consult a fund's prospectus and/or statement of additional information to determine whether you may qualify for a discount or waiver. Notify your Financial Advisor, Financial Solutions Advisor or Investment Center representative if you believe you qualify for any of these or any other discounts or waivers. Please contact your Financial Advisor, Financial Solutions Advisor or Investment Center representative for further information on available sales charge discounts and waivers.

Bank of America Merrill Lynch Global Research publishes research reports and ratings ("Research Ratings") regarding a select universe of ETFs and ETNs (collectively, "ETPs"). Research Ratings on ETPs are intended to assess the potential for outperformance of ETP peers in the same coverage category. Bank of America Merrill Lynch Global Research and other business areas, including CIO, apply different methodologies in their review of ETPs, and may arrive at different or inconsistent conclusions with respect to one or more ETPs. Neither the CIO review process nor the internal business review performed by product teams will rely on or otherwise use the Research Ratings on ETPs as an input or factor, and the CIO review process and product team's internal business review will determine an ETP's inclusion, status, and availability for solicitation through the Global Wealth & Investment Management area of MLPF&S and its affiliates.
