- This page reflects your holdings in real-time.
- Estimated annual income and yields are calculated by annualizing recent distributions and may not reflect historical experience or predict future results.
- Current values reflect 15-minute delayed prices except where indicated otherwise.
- When viewing multiple accounts, the % of Assets is the sum of market value on a position relative to the total value of all accounts selected. When a position is expanded to show the holdings in each account, the % of Assets is the value of each position relative to the total market value of the individual account.
- Option contracts are priced using the latest Bid (for long positions) and Ask (for short positions).
- Any balances reflected in this section held in a bank deposit account or in shares of money market mutual funds may be liquidated at your request and the proceeds returned to your account or remitted to you. The bank deposit interest rate paid to you is based on household account values and determined by the negotiated interest rates paid by the participating banks after deducting fees paid to a third party for administering the cash sweep program and the compensation to Baird for offering and providing various services related to the program. Please visit www.rwbaird.com/cashsweepcomp and www.rwbaird.com/cashsweeps to learn more about Baird's compensation and the cash sweep program. There are several alternatives to consider regarding your idle cash, including those with a higher yield, and we encourage you to discuss them with your Financial Advisor.
