The Estimated Monthly Income in Retirement below is designed to provide a better understanding of what you might expect in retirement. Based on your current retirement statement account balance and the assumptions noted below, a monthly lifetime retirement income has been **estimated** as both a single life annuity arrangement and a qualified joint and 100% survivor annuity arrangement.

Account Balance (including any outstanding loan balance(s)) that is not in default) as of 03/31/2024	\$27,570.71
Single Life Annuity ² monthly payment at age 67 for your life	\$176.99
Qualified Joint and 100% Survivor Annuity ³ monthly payment at age 67 for your life and for the life of your surviving spouse	\$151.35

The estimated monthly payments in this statement assume that payments begin 03/31/2024 and that you are 67 on this date. Monthly payments beginning at a younger age would be lower than shown since payments would be made over more years. Monthly payments beginning at an older age would be higher than shown since they would be made over fewer years.

¹If you have taken a loan from the plan and are not in default on the loan, the estimated monthly payments in this statement assume that the loan has been fully repaid.

²A single life annuity is an arrangement that pays you a fixed amount of money each month for the rest of your life. Following your death, no further payments would be made to your spouse or heirs.

³A qualified joint and 100% survivor annuity is an arrangement that pays you and your spouse a fixed monthly payment for the rest of your joint lives. In addition, after your death, this type of annuity would continue to provide the same fixed monthly payment to your surviving spouse for their life. An annuity with a lower survivor percentage may be available, and reducing the survivor percentage (below 100%) would increase monthly payments during your lifetime, but would decrease what your surviving spouse would receive after your death.

The estimated monthly payments for a qualified joint and 100% survivor annuity in this statement assume that you are married with a spouse who is the same age as you (even if you do not currently have a spouse or if you have a spouse who is a different age). If your spouse is younger, monthly payments would be lower than shown since they would be expected to be paid over more years. If your spouse is older, monthly payments would be higher than shown since they would be expected to be paid over fewer years.

The estimated monthly payments in this statement are based on an interest rate of 4.19%, which is the 10-year constant maturity U.S. Treasury securities yield rate as of 03/01/2024 as required by federal regulations. This rate fluctuates based on market conditions. The lower the interest rate, the smaller your monthly payment will be, and the higher the interest rate, the larger your monthly payment will be.

The estimated monthly payments in this statement are based on how long you and a spouse who is assumed to be your age are expected to live. For this purpose, federal regulations require that your life expectancy be estimated using gender neutral mortality assumptions established by the Internal Revenue Service.

The estimated monthly payments in this statement are for illustrative purposes only; they are not a guarantee.

The estimated monthly payments in this statement are based on prevailing market conditions and other assumptions required under federal regulations. If you decide to purchase an annuity, the actual payments you receive will depend on a number of factors and may vary substantially from the estimated monthly payments in this statement. For example, your actual age at retirement, your actual account balance (reflecting future investment gains and losses, contributions, distributions, and fees), and the market conditions at the time of purchase will affect your actual payment amounts. The estimated monthly payments in this statement are the same whether you are male or female. This is required for annuities payable from an employer's plan. However, the same amount paid for an annuity available outside of an employer's plan may provide a larger monthly payment for males than for females since females are expected to live longer.

Unlike Social Security payments, the estimated monthly payments in this statement do not increase each year with a cost-of-living adjustment. Therefore, as prices increase over time, the fixed monthly payments will buy fewer goods and services.

The estimated monthly payment amounts in this statement assume that your account balance is 100% vested.

TAKE ADVANTAGE OF CURRENT CONTRIBUTION LIMITS For 2024, you may be able to contribute a maximum of \$23,000 to your 403(b) or 401(k) retirement plan (possibly up to \$26,000 for certain 403(b) participants) - and, unless your 457 plan is sponsored by a nonprofit organization, if you turn 50 during 2024, you can also take advantage of the 50 plus Catch-up Provision, which permits you to contribute an additional \$7,500 during the coming year if permitted under the terms of your plan. Employees in 457 plans can save up to \$46,000 (2 x the \$23,000 maximum) through the Normal Retirement Age (NRA) Catch-up Provisions. You may not use both the NRA and the 50 plus catch-ups in the 457 plan in the same year.

It is important to verify that the beneficiary information on your account is current. Whether you decide to make a change or not, making your designation online will allow you easier access to your elections. Go to www.voyareirementplans.com to designate or update your beneficiary.

The risks of investing in small company stocks may include relatively low trading volumes, a greater degree of change in earnings and greater short-term volatility.

Foreign investing involves special risks such as currency fluctuation and public disclosure, as well as economic and political risks.

Some of the Funds invest in securities guaranteed by the U.S. Government as to the timely payment of principal and interest, however, shares of the Funds are not insured nor guaranteed.

High yielding fixed-income securities generally are subject to greater market fluctuations and risks of loss of income and principal than are investments in lower yielding fixed-income securities.

Sector funds may involve greater-than-average risk and are often more volatile than funds holding a diversified portfolio of stocks in many industries. Examples include: banking, biotechnology, chemicals, energy, environmental services, natural resources, precious metals, technology, telecommunications, and utilities.

Additional Notes

The current rate for the Voya Fixed Account - 457-401 MC 914 Fund 4019 is 2.45%, expressed as an annual effective yield. The current rate may change and be higher or lower than the previously identified rate but is guaranteed not to be less than 1.85% through 12/31/2024. VRIAC will not apply a decrease to the current rate following a rate change initiated solely by us prior to the last day of the three-month period measured from the first day of the month in which such change was effective. Note: The current rate for an initial investment in the fixed account previously identified may

be in effect for less than a full three-month period. Guarantees are based on the claims-paying ability of Voya Retirement Insurance and Annuity Company.

Investments in Target Retirement Funds are subject to the risks of their underlying funds. The year in the fund name refers to the approximate year (the target date) when an investor in the fund would retire and leave the workforce. The fund will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in the Target Retirement Fund is not guaranteed at any time, including on or after the target date.

Vanguard Target Retirement Trusts Investments in Target Retirement Trusts are subject to the risks of their underlying investments. The year in the fund name refers to the approximate year (the target date) when an investor in the trust would retire and leave the workforce. The trust will gradually shift its emphasis from more aggressive investments to more conservative ones based on its target date. An investment in a Target Retirement Trust is not guaranteed at any time, including on or after the target date.

These trust suggestions are based on an estimated retirement age of approximately 65. Should you choose to retire significantly earlier or later, you may want to consider a trust with an asset allocation more appropriate to your particular situation.

All investing is subject to risk, including the possible loss of the money you invest. Diversification does not ensure a profit or protect against a loss. Investments in bonds are subject to interest rate, credit, and inflation risk.

The Investment Option is neither a mutual fund nor part of a Separate Account. The returns listed do not include the impact of contract charges. Please refer to the contract or disclosure book to determine which Fixed Interest Options are available for your specific plan. The Investment Option is offered through Voya Retirement Insurance and Annuity Company.
